## DEEP DOWN, YOU WANT THE BEST

SCUBAPRO has been making high quality diving equipment for over 48 years. Our technical experience and commitment to innovation have enabled us to maintain a leading position in the diving industry. Our perseverance in creating high quality, extremely comfortable and safe equipment continues, so you can focus on enjoying your diving adventures.

SCUBAPRO is concerned about our environment and supports various ecological issues globally.

We strive to continue our efforts in 2011, at all levels, to conserve resources for a cleaner healthier world.

# REGULATORS

A700 BLACK TECH

LIMITED LIFETIME WARRANTY

All SCUBAPRO regulators feature  
our limited lifetime warranty.

## A700 BLACK TECH SYSTEMS

SCUBAPRO has brought innovation to the A700 regulator. Available in NEW Black Tech version, this regulator is not only beautiful and high performing, but incorporates a PVD (Physical Vapour Deposition) finishing process which, when applied on metal surfaces, increases ruggedness, scratch resistance and surface hardness. PVD coatings can also be found on critical military equipment, premium watches and tools. This finish is accomplished using Titanium Nitride and provides the following advantages:

- 2500HV hardness for significantly improved anti-scratch effect (compared to chrome's 900HV hardness and stainless steel's 190HV harness).
- Unaffected by UV rays.
- 100% non-toxic.
- High corrosion resistance.
- Low friction co-efficient.
- Very low magnetic signature.

## A700 BLACK TECH SECOND STAGE

- Precision handcrafted full metal construction and design with PVD finishing for a lifetime of exceptional dive experiences.
- Unparalleled breathing performance at any depth, any temperature, in any position.
- Full metal body and metal components assure the best thermal exchange, dramatically lowering the risk of freezing.
- Air balanced valve technology decreases the inhalation resistance resulting in super smooth breathing.
- Diver adjustable inhalation effort with micrometric adjustment knob enables personalised breathing effort control.
- Co axial VIVA (Venturi Initiated Vacuum Assist) system for more precise breathing assistance, control and comfort.
- Super high flow exhaust valve allows air to exit more freely and lowers the exhalation effort; also keeps bubbles away from face and mask.

MK25  
BLACK TECH

## MK25 / A700 BLACK TECH

The MK25 teamed with A700, is an ultra-high airflow system for maximum performance in all diving conditions. SCUBAPRO is synonymous with piston-controlled first stages. Our MK25 underscores this heritage with an array of proprietary features and ultra-stable intermediate pressure, for an extremely punctual and consistent high delivery of air, ensuring unfailing performance. For details on the A700 second stage, see above. MK25 features include:

- Air balanced flow-through piston provides constant and massive air flow unaffected by changing tank pressure.
- 2 high pressure ports and 5 low pressure ports on a swiveling turret for convenient arrangement of your gear.
- Anti-freeze protection for all diving temperatures.
- Available in either 232bar INT or 300bar DIN configurations.

## MK17 / A700 BLACK TECH

Cold water divers or those frequenting harsh environments will appreciate this perfectly matched pair. The A700 is a complete complement to the MK17, a high performing balanced diaphragm first stage engineered exactly for such conditions. For details on the A700 second stage, see above. MK17 first stage features include:

- Balanced technology provides consistent performance at all tank pressures, at any depth and optimizes the second stage performance.
- Dry ambient pressure chamber provides better protection and performance in cold water, prevents water entry, enhancing trouble-free operation.
- Balanced diaphragm design, with ultra-fast flow to the second stage to obtain the lowest possible work of breathing at depth.
- Available in either 232bar INT or 300bar DIN configurations

MK17  
BLACK TECH

## A700 POLISHED CHROME SYSTEMS

Nothing compares to this jewel of a regulator from SCUBAPRO, the A700 systems are phenomenal in beauty and in breathing performance. A700 Second stage features:

- Precision handcrafted full metal construction and design for a lifetime of exceptional dive experiences.
- Unparalleled breathing performance.
- Full metal body and metal components assure the best thermal exchange, dramatically lowering the risk of freezing.
- Air balanced valve technology decreases the inhalation resistance, resulting in super smooth breathing.
- Diver adjustable inhalation effort with micrometric adjustment knob.
- Co axial VIVA system for more precise breathing assistance, control and comfort.
- Super high flow exhaust valve allows air to exit more freely, lowering the exhalation effort; keeps bubbles away from face.

### MK25 / A700

The MK25 teamed with A700, is an ultra-high airflow system for maximum performance in all diving conditions. SCUBAPRO is synonymous with piston-controlled first stages. Our MK25 has ultra-stable intermediate pressure, for an extremely punctual and consistent high delivery of air, ensuring unfailing performance. For details on the A700 second stage, see above. MK25 features:

- Air balanced flow-through piston provides constant and massive air flow unaffected by changing tank pressure.
- 2 high pressure ports and 5 low pressure ports on a swiveling turret for convenient arrangement of your gear.
- Available in either 232bar INT or 300bar DIN configurations.

### MK17 / A700

Cold water divers or those frequenting harsh environments will appreciate this perfectly matched pair. The A700 is a complete complement to the MK17, a high performing balanced diaphragm first stage engineered exactly for such conditions. For details on the A700 second stage, see above. MK17 first stage features:

- Balanced technology provides consistent performance at all tank pressures.
- Dry ambient pressure chamber provides better protection and performance in cold water.
- Available in 232bar INT or 300bar DIN configurations.

MK25

MK17

A700

## S600 SYSTEMS

Our S600 high performance air balanced second stage systems, for premium breathing performance in all conditions.

- Balanced flow valve provides constant and effortless air flow.
- Diver-adjustable inhalation control enables personalized breathing effort.
- Diver-adjustable VIVA for powerful inhalation assistance and prevention of free-flow.
- High-flow exhaust valve for reduced exhalation effort.
- Super-flow hose for smooth air delivery.
- Available with MK25 or MK17 first stage in 232bar INT or 300bar DIN configuration.

### MK25 / S600

This is SCUBAPRO's ultimate regulator combination. SCUBAPRO is the leader in the evolution of piston-controlled first stages. Our balanced piston MK25 underscores this heritage with an array of patented features and ultra stable intermediate pressure, for an extremely punctual and consistent high delivery of air, ensuring unfailing performance. MK25 first stage features:

- Air balanced flow-through piston provides constant and effortless air flow unaffected by changing tank pressure.
- Polished chrome-plated brass body with 5 low pressure and 2 high pressure ports plus swiveling turret for convenient arrangement.
- Anti-freeze protection for all diving temperatures.

MK25

MK17

### MK17 / S600

Our ultimate S600 second stage regulator paired with a high performance, balanced diaphragm, polished chrome MK17 first stage for best breathing, especially in cold water, harsh, or polluted environments. MK17 first stage features:

- Consistent performance at all tank pressures at any depth and optimises the second stage performance.
- The dry ambient pressure chamber provides better protection and performance than any other diaphragm regulator.
- The balanced diaphragm design, with ultra-fast flow to the second stage, prevents entry of water into the first stage mechanism and enhances a trouble free operation.

S600

## G250V SYSTEMS

A classic. Our redesigned full metal G250V second stage was inspired by the highly acclaimed G250, introduced in 1986.

- Air balanced valve technology for effortless inhalation.
- High-flow exhaust valve for reduced exhalation effort.
- Metal, for excellent cold water resistance: metal inlet tube, stainless steel orifice, metal inhalation-resistance control knob for diver adjustment inhalation, and metal hose connector/heat exchanger.
- Improved VIVA knob for easier adjustment of inhalation assistance and free-flow prevention.
- First stages with G250V are available with either 232bar INT or 300bar DIN configuration.

### MK25 / G250V

Paired with our remarkable balanced piston MK25, this system brings together the essence of SCUBAPRO regulators: unparalleled first stage piston technology and unfailing second stage performance.

- Air balanced flow-through piston provides constant and effortless air flow unaffected by changing tank pressure.
- Chrome-plated brass body with 5 low pressure and 2 high pressure ports plus swiveling turret for convenient arrangement of your gear.
- Anti-freeze protection for all diving temperatures and externally adjustable intermediate pressure.

### MK17 / G250V

A cold water combination.

- Balanced technology provides consistent performance at all tank pressures at any depth for effortless breathing.
- The dry ambient pressure chamber provides better protection and performance in cold water.
- The balanced diaphragm design, with ultra-fast flow to the second stage, prevents entry of water into the first stage mechanism and enhances a trouble free operation, even in the coldest or most polluted conditions.
- Patented finned cap with ribs acts as a radiator to increase the surface area of heat transfer from the water to warm the internal parts.

## C300 SYSTEMS

New for 2011, our compact C300 Systems offer uncompromising breathing performance for avid recreational divers. The C300 second stage is lightweight with anti-scratch cover. It allows all the adjustment options of a high-end regulator while remaining a mid-range system. The C300 second stage features:

- The Optimal Flow Design valve (OFD) for reliable and high air flow, improving work of breathing compared to a downstream valve.
- Diver-adjustable coaxial VIVA for powerful inhalation assistance and prevention of free-flow.
- Diver adjustable inhalation control for personalized breathing effort.
- Redesigned mouthpiece tube allows better exhaust airflow.
- Available with either 232bar INT or 300bar DIN first stages.

### MK25 / C300

The MK25/C300 has our ultimate balanced piston first stage paired with a reliable recreational second stage, making this a remarkable all-rounder system. MK25 first stage features include:

- Air balanced flow-through piston provides constant and effortless air flow unaffected by changing tank pressure.
- 2 high and 5 low pressure ports on a swiveling turret.

### MK17 / C300

Our MK17/C300 regulator combines the new OFD technology with the sturdiness of our balanced diaphragm first stage. MK17 first stage features:

- Engineered for use in cold water, polluted or harsh environments.
- Consistent performance at all tank pressures at any depth.
- The dry ambient pressure chamber provides better protection and performance.
- The balanced diaphragm, prevents entry of water into the first stage mechanism.

### MK11 / C300

The new MK11 is more compact and lightweight without affecting reliability or performance. Paired with the C300, it is the perfect travel package. MK11 first stage features:

- Diaphragm system prevents entry of water and pollutants.
- Balanced first stage allows prompt delivery of air at all tank pressures.

MK25

MK17

MK11

C300

## C200 SYSTEMS

New for 2011, this second stage offers the breathing benefits of our OFD valve in a simple, worry free regulator. The small dimensions of this second stage make it compact and comfortable. The C200 second stage features include:

- The Optimal Flow Design valve (OFD) allows reliable and high air flow, due to the incorporation of new technology which improves work of breathing performance compared to a classic downstream valve second stage.
- Diver-adjustable aligned coaxial VIVA for powerful inhalation assistance and prevention of free-flow.
- Redesigned mouthpiece tube allows better exhaust airflow and lowers the work of breathing.
- Anti-scratch cover.

### MK11 / C200

The C200 paired with our lightweight, balanced diaphragm MK11 first stage: you can't get any easier. The new MK11 is made from a forged brass body, enabling the removal of excess weight without affecting reliability or performance. For details on the C200 second stage, see above. MK11 First stage features include:

- Diaphragm system prevents entry of water and pollutants.
- Balanced first stage allows prompt delivery of air at all tank pressures.

## R295 SYSTEMS

Robust design and low maintenance, yet dependable breathing, are key for this classic recreational regulator.

- Classic downstream valve second stage is legendary for rugged, reliable performance.
- Fixed VIVA in pre-tuned position, ideal for safe and uncomplicated use.
- Left and right hose attachments for total flexibility.

### MK2 PLUS / R295

A classic downstream piston teamed with a classic downstream second stage means reliability, durability and easy care. The MK2 was first introduced in 1962 and has been a solid performer ever since.

- Simple, classic downstream first stage piston mechanism for trouble-free performance and minimum maintenance.

MK11 / C200

MK2 PLUS / R295

## AIR2

In 1979, SCUBAPRO created the AIR2 concept. It is now in its fourth generation and is more streamlined, modern, ergonomic and lighter than previous versions. Great for traveling divers. AIR2 provides smooth reliable BC inflation at all tank pressures. AIR2 is more than a simple inflator. Its components' design takes advantage from the best regulator technology to guarantee maximum efficiency and reliability. Ergonomic shape makes it easy-to-handle in any circumstance, it can be automatically emptied by simply pressing the exhaust button.

- Single hose configuration to streamline diver.
- One-hand operation ensures efficient use.
- Self-flushing mechanism requires single push of purge to clear away impurities.

## C200 OCTOPUS

OFD valve design.

- Diver-adjustable coaxial VIVA for inhalation assistance.
- High visibility yellow cover and 1 meter long yellow hose for easy access and air sharing.
- Compact size and lightweight, anti-scratch, cover for comfort and reduced drag.

AIR2

## R295 OCTOPUS

Classic downstream valve for reliable performance.

- Fixed VIVA for ready-to-use simplicity.
- Hi-visibility yellow cover, 1 meter long yellow hose and hose protector, for easy access and air sharing.
- Left or right hose attachments for personalised flexibility.
- Compact and lightweight for comfort and reduced drag.

## SCUBAPRO DEDICATED NITROX SYSTEMS

Nitrox (oxygen enriched air) is the term used to describe breathing gases made of oxygen nitrogen mixes with the oxygen percentage higher than 21% (air). SCUBAPRO offers two fully dedicated Nitrox systems based on our piston first stages and developed in compliance with the most stringent safety norms on breathing apparatuses.

- MK25/S555 Nitrox is the choice for advanced and passionate recreational divers who require the top performance of a balanced piston first stage coupled with an air balanced second stage.
- MK2 PLUS/R295 Nitrox combines our classic downstream piston with a classic downstream valve second stage for simplicity and top reliability. Ideal for rental and diving centres.

T-BLACK

X-FORCE

## T-BLACK

T-Black has been engineered to offer diving excellence on demand: this front adjustable jacket features customised lift capabilities along with sophisticated technology.

- AirFlex Technology System and high capacity bladder for high buoyancy lift. With bungee enclosures, extra stability and quick deflation.
- Quick-release integrated weight system.
- Two expandable rear trim pockets for well-balanced swimming position.
- 3-dump valve system for a variety of deflation positions.
- Steel super-cinch tank band for easy adjustment and secure grip.
- Robust quality materials: Aircell is heavy duty Cordura 1000. BC interior is lightweight and comfortable Nylon 420.
- Cordura Color-Lock protects against the elements.
- Heavy duty shoulder strap buckles.
- T-comfort padded backpack, broad enough for all sizes.
- Hydro-dynamic cut and hi-grip foam padding on cummerbund and shoulder ensure perfect fit and comfort.
- Expandable pockets for accessory storage. Seven stainless steel D-rings.
- Available with Balanced Power Inflator (BPI) or optional AIR2.

## X-FORCE

X-FORCE is more than a powerhouse of features, making it perfect for passionate and advanced recreational divers. Pre-formed wrap-around bladder provides higher buoyancy with increased volume in lower back. Say goodbye to squeezing with its superior fit and weight distribution, for unbelievable comfort.

- Quick-release weight buckle retaining system allows one-hand operation and easy to find for optimal safety.
- Additional back pockets offer trim counterweight storage.
- Backpack and soft neck protection with Air-Net padding for increased comfort and protection.
- Shoulder pads and straps covered in anti-slip material.
- Constructed of high-resistance Cordura 500 exterior and Nylon 420 interior, guaranteeing durability.
- Cordura Lock protects against the elements.
- Octopus holder keeps gear neat and accessible.
- Available with Balanced Power Inflator (BPI) or optional AIR2.

T-SPORT PLUS

T-ONE

## T-SPORT PLUS

The ideal front adjustable BC for the recreational diver, incorporating premium elements for optimal diving.

- Integrated quick release weight system for safety and convenience.
- Adjustable cummerbund system for flexible fit.
- Padded backpack for supreme comfort.
- Tank band with durable plastic buckle system for lightweight, easy to adjust security.
- Durable 500D Cordura construction for robust wear.
- 3-dump deflation system, with welded valves for increased safety.
- UV resistant colour system to avoid fading.
- Rotating buckles on adjustable shoulder straps improves fit.
- Multiple plastic D-rings plus zippered pockets for accessory attachments and plastic grommets for knife attachment.
- Available with Balanced Power Inflator (BPI) or optional AIR2.

## T-ONE

This simple adjustable BC looks better than ever. It's the perfect buoyancy compensator for entry level divers, diving clubs and rental, or anyone who just wants to get back to quality basics. And its very lightweight.

- Durable 1000D exterior for long-term wear.
- Lightweight tank band with durable plastic buckle system.
- Octopus holder for easy accessibility.
- Ergonomic pocket design for easier opening in any conditions.
- Comfort backpack.
- Pre-constructed knife attachments points.
- Embossed cummerbund.
- Color coded size tags.
- Available with Balanced Power Inflator (BPI).

## GEO

GEO suggests Global, and that's our message with this true travel BC: go dive the world. It's not only lightweight and unbeatable in comfort, but complete with original features, incorporating SCUBAPRO quality, style and spirit of adventure. Size large weighs a mere 1,9 kgs.

- Adjustable single-air cell BC provides high buoyancy and maximum comfort for travel divers.
- Made in light and resistant 210 Nylon denier material coated with polyurethane.
- Foldable Airnet backpack is lightweight and soft, without rigid elements.
- The entire BC can be easily folded, secured with a dedicated buckle and stored in its own travel sack.
- Easy to access in any condition, the high profile pockets are reinforced with strong mesh for long wear and quick drying.
- Double tank belt provides extremely good balance in any position and doesn't put pressure on your back.
- Light shoulder strap buckles, large size anodized aluminum D-rings and a carrying handle make Geo feature rich, yet still lightweight.
- Side grommets for SCUBAPRO knife attachment.
- Available with Balanced Power Inflator or optional AIR2.

GEO

EQUATOR  
GRAY

## BELLA

The Bella was specifically designed and tailored for female divers.

- Wrap-around air bladder retains cradle-like shape to "hug" the diver throughout full range of inflation, ensuring optimum fit, comfort and total control in all diving environments
- Pads in shoulder area for enhanced comfort when gearing up.
- Rotating quick-release shoulder buckles.
- 3-dump deflation system for best buoyancy control in varying diving positions.
- Quick-release integrated weight system.
- Two rear trim pockets counterbalance the front weight, providing a well-balanced swimming position.
- Soft neoprene neck and padded backpack for optimum comfort.
- Fully-adjustable cummerbund to ensure proper fit.
- Zippered cargo pockets and 6 stainless D-rings.
- Available with Balanced Power Inflator (BPI) or optional AIR2.

BELLA

EQUATOR  
RED

## EQUATOR

Perfect for circling the world where ever your dive adventures lead. The Equator is clean and lean: the lightweight design makes it an ideal front adjustable BC for diving at home or elsewhere. Comfort and performance are assured.

- Front Adjustable design with rotating quick-release shoulder buckles.
- Smaller back-pack allows BC to fold easily into a travel bag.
- Proprietary quick-release integrated weight system.
- Soft neoprene neck trim and padded backpack for optimal comfort.
- 3 dump valves enables you to dump air from a variety of underwater positions.
- Fully adjustable cummerbund ensures proper fit and security.
- Zippered cargo pockets for accessories, plus metal D-rings.
- Pre-constructed knife attachment points.
- Delivered with the Balanced Power Inflator and LP hose.
- Available with Balanced Power Inflator (BPI) or optional AIR2.
- Available in Grey or Red color options.

## CLASSIC EXPLORER

A simple stabilizing jacket for recreational divers wanting durability and total comfort. The 3D concept allows air to move freely, enabling precise, predictable buoyancy, high lift capacities and perfect fit.

- Its 'face up' position assures a high level of safety.
- Unique hand-glued construction for leak-proof seams and longterm durability.
- Contoured shaping for perfect fit.
- 3-dump deflation system and BPI are reliable and easy to operate.
- Thick pre-molded padded back pack for maximum comfort.
- One-hand operation stainless steel super-cinch tank band is easy to adjust.
- Accessory-packed with safety whistle, 5 stainless D-rings and knife attachment points on both large pockets.
- Available with Balanced Power Inflator (BPI) or optional AIR2.

MASTER

CLASSIC EXPLORER

## MASTER

The Master jacket is the stabilizing jacket choice of commercial, military, instructors and advanced divers needing intensive use, precise buoyancy, control and comfort.

- The Master jacket has been certified as Combined Buoyancy and Rescue Device thanks to its lift capacity and the "face up" body position at the surface.
- 3-dump deflation system enables divers to dump air from a variety of underwater positions.
- Reflective patches on pockets and shoulders enhance visibility.
- Durable double bladder construction to ensure resistance.
- Adjustable harness transfer loads of heavy tanks onto the stable polyester strap system for better durability and fit.
- Fast drying padding in cummerbund, back and shoulder area.
- Stainless D-rings and elastic loop for safety-light attachment.
- Available with Balanced Power Inflator (BPI) or optional AIR2.

## SEAHAWK

The Seahawk is a new addition to our family of dynamic, comfortable back flotation jackets. The Seahawk allows excellent freedom of movement, while still allowing adequate storage.

- Proprietary quick-release integrated weight system.
- Two rear trim pockets.
- Two large zippered cargo pockets.
- Ergonomic harness for even load distribution.
- Rotating quick-release shoulder buckles and adjustable shoulder straps.
- Soft neoprene neck trim and plush backpad.
- Air cell constructed with 420-denier interior and 1000-denier nylon exterior.
- Knife attachment grommets.
- Pre-bent stainless steel D-rings.
- Available with Balanced Power Inflator or optional AIR2.

SEAHAWK

## LADYHAWK

Back flotation technology positions the air bladder in the back, providing exceptional freedom of movement around chest and shoulders. This women's version has a female-specific cut and design.

- Quick-release integrated weight system.
- Two rear trim pockets counterbalance front weights and provide a well-balanced swimming position.
- 3-dump deflation system enables divers to dump air from a variety of underwater positions.
- Harness incorporates anatomically-shaped components for even load distribution.
- Streamlined air cell technology and automatic volume control through compression straps.
- Rotating quick-release shoulder buckles and adjustable shoulder straps improve fit.
- Dual-zippered pockets with rollout pocket and pre-bent stainless steel D-rings.
- Soft neoprene neck roll and skin friendly padded back pack.
- Firmly padded, flexible cummerbund compensates for changes in the suit resulting from varying depths.
- 1000 denier nylon, our heaviest material for maximum resistance to punctures and abrasion.
- Available with Balanced Power Inflator or optional AIR2.

LADYHAWK

LITEHAWK

## LITEHAWK

The LiteHawk is the travel version in our back-flotation family. Divers get the benefits of back flotation in this lightweight BC.

- Low-drag, low profile progressively-shaped air cell on a light back flotation BC.
- Elastic cords automatically control the size and keep the air cell streamlined when partially inflated.
- Constructed in durable 1000 Denier Nylon for long life wear.
- Super Cinch system for improved stability.
- Adjustable belt-style waist strap with Nylon lightweight buckle.
- Lightweight, perfect for travel: just 2,36 kg.
- Available with Balanced Power Inflator or optional AIR2.

## SCUBAPRO X-TEK

SCUBAPRO launches a premium TEK line: Winter 2011. SCUBAPRO has been developing and manufacturing premium dive gear for well over 40 years. Our experience, engineering expertise and eternal commitment to high quality diving equipment have all enabled us to offer a premium TEK line, including TEK harness, buoyancy cells and accessories, regulators, suits, computers, fins... every major piece of equipment necessary for optimal TEK diving. See [scubapro.com](http://scubapro.com) and our TEK specific brochure for more details.

# INSTRUMENTS

**POLAR**  
LISTEN TO YOUR BODY

POLAR BELT

GALILEO SOL

## GALILEO SOL

The Galileo Sol is our ultimate dive computer, with limitless, unique-to-the-industry features.

- Exclusive Heart Rate Monitoring System: Galileo Sol is the first and only dive computer to have an integrated heart rate monitor, incorporating the heartbeat into the workload, and then tailoring the decompression calculations to your dive.
- Full-Tilt Digital Compass with Bearing Memory: A powerful navigational system with integrated digital compass. Remains accurate regardless of inclination.
- Extra-large Dot Matrix Display and Huge Memory: stores pictures, tables, tissue loading status and the most recent 100 hours of diving in a 4-second sampling rate.
- Hoseless gas integration: When used with a Smart transmitter you get tank pressure and true remaining bottom time (RBT).
- PDIS (Profile Dependent Intermediate Stops), a unique scientific application, optimizes your dive in complete security.
- APNEA Mode available via a free upgrade on our web site: includes unique features like faster sampling rates, manual start, current and maximum depth, dive time in minutes and seconds, water temperature, ascent and descent speed, APNEA specific alarms/warnings, adjustable water density and an APNEA specific logbook.
- Predictive Multi Gas allows you to enjoy the full benefits of carrying high oxygen concentration mixes in addition to your main breathing gas.
- Upgrade your computer with new functions and features downloaded from our web site.

TRANSMITTER FOR  
GALILEO SOL & LUNA

- See what you, want when you want by choosing one of the 3 pre-configured screen display modes: LIGHT mode shows the most important information in the biggest possible figures. FULL display gives you everything at once. CLASSIC mode is the perfect balance between the two.
- Alarms and warnings displayed in the language of choice. And warnings can be visual, audible or both.
- Galileo's user interface is as easy to use, program and view as a cell phone: Menus, settings and functions are in your language of choice.
- Oil filled technology: Allows us to make a slim designed computer with an extra-large rectangular display. Oil filling also gives us more technological freedom and is the reason we are the only dive computer on the market rated to a depth of 330 meters per EN13319 standards.
- User-replaceable battery.
- Infrared technology and PC download capability.
- Contains innovative core technologies including: Buhlmann ZH-L8 ADT (Adaptive) Algorithm, Microbubble Management, Multi-Gas Diving, Nitrox compatibility, True Remaining Bottom Time and Smart Trak.

## GALILEO LUNA

The Galileo Luna model is everything you need for an extraordinary underwater experience. Luna contains all of the core Galileo technology and all features of the Sol except two elements, which can be added as optional upgrades later (Heart Rate Monitor and Predictive Multi-Gas).

GALILEO LUNA WITH  
OPTIONAL CLIP

GALILEO  
LUNA

## ALADIN 2G

Aladin 2G is a clear example of relentless development. Engineered for technical divers who want specific features for total freedom in full safety, and for recreational divers who appreciate detailed, yet easily accessible information, but want the possibility to evolve in the sport. The Aladin 2G combines a sophisticated algorithm with the compact size and accessibility of the Aladin.

- PDIS (Profile Dependent Intermediate Stops) optimizes your dive in complete security. The PDIS option calculates an intermediate stop based on how much nitrogen uptake your body has endured, taking into account your current dive, previous dives and breathing mixes.
- APNEA Mode with unique features: includes faster sampling rates, manual start, current depth, maximum depth, dive time in minutes and seconds, water temperature, ascent and descent speed, APNEA specific alarms and warnings, adjustable water density and an APNEA specific logbook.
- Predictive Multi-Gas: Allows you to enjoy the full benefits of carrying high oxygen concentration mixes in addition to your main breathing gas.
- Gauge mode – operates as technical depth gauge to a depth of 120m, with one-press stopwatch function. Unique in the diving industry, in this mode it displays a continuously updated average depth, which can be reset by the diver at any time.
- Active backlight with push-on, push-off function.
- Bookmark function during dive – highlight specific moments with a simple button press and add comments in the SmartTRAK profile later.
- Altimeter accurately measures altitude with a 15m resolution. The altitude alarm alerts the diver when approaching an altitude incompatible with saturation status due to a recent dive.
- Nitrox settings between 21% and 100% in 1% increments.
- Full watch functions and a basic choice of adjustments without the need of a PC.
- Adjustable ppO<sub>2</sub> between 1.0 and 1.6bar

Aladin 2G is available in:

Wrist model and 3-gauge inline console incorporating analog 400bar tank pressure gauge and FS-1.

ALADIN 2G

ALADIN 2G  
3-GAUGE CONSOLE

## DIGITAL 330M

An original 'one-of-a-kind' digital depth gauge. It integrates basic dive information into a highly accurate and accessible electronic instrument, imperative for all diving levels. The Digital 330m is the perfect evolution of the classic Digital Depth Gauge, which was introduced by UWATEC in 1989. Targeted for technical divers, but also ideal for beginners or as a back up instrument whatever your level, the Digital 330m offers precise accuracy in all diving conditions.

- Displays average depth alternating with temperature.
- Displays ascent speed in meters-per-minute plus warning arrow if you ascend too fast.
- Rated to a Maximum Depth of 330m.  
Depth accuracy: 0.1%  $\pm$  0.1 m.
- Maximum displayed bottom time is 999 hours 59min.
- More efficient, consumes less power than previous Digital.
- Unlimited altitude range accounting for variations in atmospheric pressure.

- Log book gives access to most recent 19 dives.
- Quartz clock time measurement.
- Temperature display resolution & accuracy in full one degree increment ( $\pm 1$  °C); -10 °C to +50 °C operating temperature range.
- Upgraded graphics on our ultra-visible display.
- Available in wrist, 3-gauge inline console and 2/1 console (3-gauge two-sided) configurations.

## TITANIUM WATCHES

Two SCUBAPRO dive watch models available:

- Swiss Mechanical Movement or Swiss Quartz Movement.
- Machined Titanium case.
- Engraved screw-type case back.
- Screw-down Titanium crown.
- Rotating Titanium Bezel.
- Scratch-resistant crystal glass.
- Each unit with interchangeable straps: Titanium bracelet with easy-adjust system and silicone rubber secondary strap.
- Ultra-luminous dial and hour/minute hands.
- Magnified date display.
- Water resistant to 200m.
- Includes tools for changing straps.
- Packaged in a special design box with "S" logo.

TITANIUM WATCHES

### STANDARD DEPTH GAUGE

Fluorescent scale with built-in temperature gauge on our streamlined wrist strap.

- Oil-filled depth gauge in an impact-resistant nylon case.
- 60m linear scale with maximum depth indicator for easy logging.
- Bourdon tube design makes it as precise at depth as in shallow water.
- Available in wrist unit or in 3-gauge Inline and 2/1 consoles with FS-1 or FS-2 compass.

### SCUBAPRO COMPACT 2-GAUGE CONSOLE

The perfect back-up system for reading air consumption and depth information at a glance.

- Pressure gauge: 0 to 400bar, adapted to 200bar and 300bar technology. Red zone between 50bar and 0bar for better safety.
- Depth gauge: 70m N2 filled with parabolic scale for reliable reading even in shallow water. Maximum depth indicator for easy tracking and logging.
- Safety lanyard loop on case.

### SCUBAPRO MAKO CONSOLE

A 2-gauge compact console perfect for traveling. Includes a pressure gauge and standard compass;

- Luminous dial 400bar pressure gauge with oil-filled, polycarbonate case compass.
- Extra top side loop attaches to safety lanyard.
- Side-view window for precise bearing while swimming.

### SCUBAPRO COMPACT PRESSURE GAUGE

Ensure your safety with a minimum bulk small back-up instrument.

- 400bar scale adapts to 200bar and 300bar technology. Compatible with high pressure systems.
- Red zone between 50bar and 0bar for better safety.
- Two extra side loops for a safety lanyard attachment.

## STANDARD PRESSURE GAUGE

Fluorescent scale and extended longevity. A useful gauge for beginners or as a reliable backup system for all diving levels. Scale to 400bar for use with 200bar and 300bar tanks.

- Available as photographed or in 3-gauge inline and 2/1 console.

## C-1 COMPASS

A very compact compass for general orientation. Includes a 'quick-connector' for easy attachment to U-Line consoles and most wrist gauges.

## FS-1 AND FS-2 COMPASSES

Durable, accurate, standard instruments for underwater navigation, ensuring accurate and reliable performance over a long period of time. They are virtually unaffected by pressure because they are oil filled and sealed from the environment. Even divers with no underwater navigation experience will find our unique, dual-reading displays easy-to-follow, even while swimming in a horizontal position.

- The FS-2 provides a unique tilt angle of at least up to 35 degrees, making it easier to read and operate in most any position. With a floating magnet separate from the compass rose, the FS-2 has a greater angle of operating freedom than conventional compasses. And this means you can use the same compass for both Northern and Southern hemispheres, so perfect for travelling divers.
- FS-1 compass can be used at a tilt angle of up to 15 degrees.
- Scratch-resistant and durable oil-filled polycarbonate case.
- Highly luminous dial for easy reference in low light conditions.
- Side view window for easy and accurate navigation.
- FS-1 available in wrist model and in retractor model or with clip boot alone.
- FS-2 available in wrist model and in retractor model for easy attachment.

# SUITS

## **FJORD HD ROCK BOOTS**

- Solid rock boot designed for all Drysuits.
- Resistant Heavy duty grip sole.
- Lace-up front for security and easy adjustment.

## **CLIMATEC UNDERWEAR**

The perfect complement to the Everdry4 and to all neoprene drysuits. Lightweight, water-repellent, breathable, 2-layer soft material. 2-slider front zipper, ankle stirrups and thumb loops, Velcro® neck closures and zippered pocket for easy access, wear and convenience. Folds up easily for transport and storage.

## EVERDRY4

Comfortable like a wetsuit, but keeps you warm & water tight like a dry suit. Everdry4 was created for demanding recreational divers wanting easy-to-wear advanced dry suit protection.

- In professional black with metallic silver graphics and logos, this suit says SCUBAPRO quality and spirit throughout.
- 4mm high-density neoprene maintains optimal thermal insulation but weighs 50% less than a traditional dry suit.
- Ensures better protection and buoyancy stability at depth than a traditional wetsuit.
- Featuring Si-Tech balanced side-activated inlet and adjustable outlet valves, facilitating better buoyancy operation and increased comfort.
- Flexible neoprene socks, fitting a broad range of sizes. Can be worn with our optional Fjord HD Rock Boots or neoprene boots.
- Dry back zipper with neoprene protection flap keeps water out.
- Convenient zippered pocket.
- Available in men's and women's sizes. Our lady's version is specifically shaped for perfect fit on the female form.
- I-Safe strap on lower arm keeps a dive computer well secured.
- Reversed construction rolling neoprene neck seals guarantee watertight protection without the hair-pulling or potential allergy risks of traditional latex. Velcro closures on each side, for complete adjustment and comfort.
- Easy-to-repair neoprene wrist seals for comfort.
- Elastic, adjustable & removable suspenders for a better fit.
- 5 & 6.5mm anatomically shaped dry hood with prolonged neck & soft face & neck seals, plus air release valve system.

## EVERTEC

This new addition to our family of drysuits is not only stylish in black with white graphics, but also provides high-end features and comfort.

- High quality, heavy duty tri-laminate material ensures durability and quick drying, yet remains light weight. With reinforced fabric in contact areas.
- Featuring Si-Tech balanced side-activated inlet and adjustable outlet valves, facilitating better buoyancy operation and increased comfort.
- Telescopic torso, elastic suspenders and crotch strap for easy wear and fit.
- Flex Seal seams keep the suit comfortable and flexible.
- Long diagonal front zipper for self closing and easy donning, including an additional nylon protective flap to protect the dry zip.
- Easy access utility pocket located on thigh.
- I-Safe strap on lower arm keeps a dive computer well secured.
- 5 & 6.5mm anatomically shaped hood with prolonged neck & soft face & neck seals, plus air release system for more warmth.
- Warm neck exterior collar keeps heat in and protects the latex collar.
- Soft compressed neoprene socks can be worn alone or with neoprene or Fjord Rock boots.

## FJORD

The perfect membrane dry suit for resistance and protection, especially appreciated in cold water.

- Shoulder-to shoulder durable brass back dry zipper with Velcro closure protection flap keeps water out.
- Si-Tech® balanced side-activated inlet and adjustable outlet valves facilitate better buoyancy operation and increase comfort.
- Durable kneepads for abrasion resistance.
- Convenient pocket on right thigh for accessories.
- Latex wrist and neck seals plus Comfort Neck exterior with two-sided Velcro, providing extra warmth.
- Incorporated boots with anti-slip soles and fin strap retainer.
- Anatomically shaped hood with prolonged neck and Fairskin interior.
- I-Safe, a convenient and secure strap attachment for your computer or instrument.

FJORD

POLAR SHELL UNDER SUIT

## NOVASCOTIA 6.5

This semi-dry concept from SCUBAPRO incorporates many of the advantages of wetsuits and drysuits into one sleek and comfortable package. Our NEW restyled NovaScotia is now made entirely of 6.5mm Everflex neoprene, making it extremely comfortable. It offers a low profile, strong sealing and great protection in the water, yet doesn't require bulky undergarments. This suit experiences minimal water entry and provides maximum flexibility.

- Constructed entirely of 6.5mm Everflex neoprene for extreme comfort, insulation & fit.
- Newly restyled and re-sized for better fit. Also available in real lady's sizes, conforming to the female form.
- Plush interior keeps you comfortable and warm.
- Heavy-duty, self-repairing dry zipper across back shoulders keeps water out.
- 3 mm fold over collar and semi-dry neck seal combined with 6 mm Silverskin lined hood and 3 mm face seals protect from water entry.
- Improved wrist and ankle 3mm double seals in ultra-smooth Glideskin neoprene for additional dry protection.
- Tatex knee reinforcements.

## POLAR SHELL UNDER SUIT

Complete thermal protection for membrane drysuits in a super-soft 2-piece under suit, ensuring ultimate comfort from start to finish.

- Water and wind proof: made with a tri-laminate exterior softshell material: nylon/polyester with breathable membrane inside and completed with microfiber inner lining.
- Both dive and surface time have been considered: Jacket and suspender pants can be worn separately. Large venting on arm allows air to escape when diving, with wind proof backing to prevent surface chill.
- Neoprene seals on arms and legs provide added insulation and comfort.
- Vertical zipper for easy access to interior pockets.
- Stretch panels under the arms for better flexibility.
- Pockets double as vents to prevent excess air getting trapped inside. Velcro compression straps on calves, limiting air descending into feet area.
- Thumb and ankle pull-straps for easy donning/doffing.

NOVASCOTIA 6.5

## EVERFLEX

Our extra-comfortable EverFlex line gives you fantastic freedom. EverFlex neoprene steamers are in a pre-formed dimensional shape so they fit and move more naturally with your body and deliver unparalleled comfort and flexibility. EverFlex provides excellent fit for a wide range of people.

### EVERFLEX STEAMERS

- 100% EverFlex neoprene material construction using multi-thickness panels for a superior combination of warmth and flexibility.
- Torso lined in absorbent Heliospan material. This smooth fabric soaks up and holds water, providing extra insulation and warmth.
- Double-blind stitched outer seams and single-blind stitched inner seams.
- Glideskin seals at the wrist, ankles and neck minimizes water transfer.
- Ankle zippers with Glideskin seals on the 7/5mm and 5/4mm steamers.
- Smooth-cut neckline for enhanced non-pulling comfort.
- Compression-molded combination zipper flap/spinepad reduces water entry and improves back protection.
- Integrated Tatex knee pads for abrasion resistance.
- Metal main zipper slider is sturdy and yet easy to operate.
- Treat yourself to total comfort with our 3/2mm EverFlex steamer. This warm water suit looks great on and feels so comfortable you will forget you are wearing one.

### EVERFLEX JACKETS

EverFlex neoprene makes this multi-purpose 5mm jacket ideal both in combination with EverFlex steamers or alone as a shorty for tropical diving or snorkeling.

- Powertex super abrasion resistant fabric is applied to the seat area, offering longer wear.
- Tatex shoulder protection for added abrasion resistance.
- Front zip entry for easy donning and protection from water entry.
- Available with and without hood in both men's and women's sizes.

EVERFLEX STEAMER

EVERFLEX 3/2 MM STEAMER

## PROFILE STEAMER

## PROFILE

The Profile line suits can be paired in multiple combinations to fit all divers and water environments. Our Profile suits offer a perfect blend of style and function.

## PROFILE STEAMERS

- Zippered double seals on wrists and ankles for 5mm and 7mm steamers.
- Fine micro-plush interior on 5mm and 7mm steamers, keeping you warmer.
- Flexible neoprene with contemporary graphic accents, plus multi-flex material on inner arms and lower legs.
- Easy to operate metal main back-zipper for water sealing and streamlined look and fit.
- Smooth-cut neckline provides unprecedented comfort.
- Double-blind-stitched outer seams and single-blind-stitched inner seams: durable yet no chaffing.
- Nylon webbing thumb loop at base of back zipper for easy donning.
- Integrated Tatex kneepads for abrasion resistance.
- Available in 3mm, 5mm and 7mm thickness in men's and women's sizes.

## PROFILE JACKETS

Teams with Profile steamers to provide extra warmth in colder water.

- Front-zipper entry restricts water entry and enables the proven 'opposed zipper concept' when combined with a back-zip steamer.
- Available in 5mm thickness with hood in men's and women's sizes.

EVERFLEX  
JACKET

PROFILE JACKET

### PROFILE 0,5MM STEAMERS

An ultra-thin neoprene steamer, extremely comfortable and ideal for tropical waters or as an added layer.

- 0,5mm neoprene outside and Silverskin inside for easy donning.
- Comfortable and non-chafing flat seam construction.
- Thumb and ankle straps for added convenience.
- Reinforced shoulders for more durability.
- Back zip design for ergonomic fit.
- Available in men's and women's sizes.

### HYBRIDS 1MM STEAMERS

Our Hybrid is a lightweight suit perfect for use in warmer water.

- 1mm N2S for warmth and flexibility.
- Smooth exterior chest panels for quick drying to minimize evaporative heat loss.
- Available in men's and women's sizes.

### PROFILE SHORTIES

This lightweight neoprene shorty will soon be your steady companion for all your warm water diving and snorkeling activities.

- 2,5mm durable and fast drying N2S neoprene.
- Back zipper for streamlined look, fit and convenience.
- Flat-seam construction for durable non-chafing wear.
- Available in men's and women's sizes.

### KIDS SHORTY

- High quality 2,5mm neoprene for temperate and warm water.
- Available in four sizes:  
4/6 years, 6/8 years, 8/10 years, 10/12 years.

### T-FLEX TOPS

High-quality, UV-rated FlexTec shirts, close-to-body, fit to wear under a suit for added warmth, or used solely as a rash guard for your snorkeling and swimming experiences. Available in men's and women's sizes with short sleeves and in various colour combinations.

PROFILE 0,5MM STEAMER

HYBRIDS 1MM STEAMER

PROFILE SHORTY

KIDS SHORTY

## HYBRID T RASH GUARDS

Stylish UV-rated FlexTec shirt with added protection of neoprene on torso. Wear as an underlayer or use as a rash guard when snorkeling or swimming.

- Lightweight FlexTec on sleeves, sides, and collar allows freedom to move and easy donning while offering UV protection.
- 1mm neoprene panels on front and back torso are quick drying to prevent evaporative heat loss.
- Available in all black with short sleeves in men's and women's sizes. Women's version with blue long sleeves and men's with black long sleeves.

## HOODED VEST

Designed to layer with SCUBAPRO steamers. Easy to dress and fast drying, it provides extra warmth over the torso.

- 2,5mm neoprene on front and back sections and hood, with Glideskin interior and 0,5mm ultra-stretch side panels.
- Non-water absorbent and excellent sealing effect.

HYBRID T RASH GUARD

T-FLEX

HOODED VEST

### **SUPERSTRETCH HOOD**

- Available in 3mm/5mm or 3mm/6.5mm versions.
- Very comfortable to wear.
- 3mm titanium metalite Silverskin face and bib to restrict water entry.

### **EVERFLEX HOOD**

- Thickness: 3mm/5mm.
- EverFlex material outside for great stretch and ultimate comfort.
- Silverskin 3mm for frontal and bib parts, with extended bib area for a better fit under jacket and added protection.

### **K-GRIP GLOVES**

- Ergonomic design and fit for excellent dexterity in temperate to cool waters.
- Available in 3mm and 5mm thickness with Velcro® closure at wrist or 5mm double sealed with elastic wrap and Velcro® closure.
- Made with Kevlar® brand fiber to reinforce palms, fingers and fingertips providing exceptional abrasion and wear resistance.  
(KEVLAR is a registered trademark of E.I. du Pont de Nemours and Company.)

### **EVERFLEX GLOVES**

- Thicknesses: 3mm, 5mm Everflex neoprene.
- Ultra smooth Silverskin lining.
- Very flexible and extremely easy to put on and take off.

### **HYPERFLEX GLOVES**

- Provide excellent dexterity in temperate to cold waters.
- 3mm thickness with velcro closure at wrist.
- 5mm version with elastic wrap and Velcro® closure at wrist.
- Non-slip printing on palms and fingers.

### **TROPIC GLOVES**

- 1,5mm soft thin neoprene for protection in warm waters.
- New reinforced finger tips for better wear resistance.
- Amara fabric layer on palm is resistant to punctures and remains soft when drying.
- Available in Black/Gray.

### HYBRID CARGO SHORTS

A unique concept to be worn over all types of suits, adding two extra pockets for total convenience.

- 1mm FlexTec material with drawstring waist.
- Reinforced seat for better wear.

### HEAVY DUTY BOOTS

- Thickness: 6,5mm, shaped like an athletic shoe.
- Lightweight sole with added flexibility, rugged and stable for varying conditions.
- Built-in arch support for prolonged comfort.
- Gusseted zipper toe and heel caps, fin strap retainer integrated into the heel cap.
- 105° slant at the ankle area to mimic foot orientation in its natural swimming position.

### SEMI-DRY BOOTS

- Thickness: 6,5mm.
- Rubber sole for added comfort.
- For cold water with Velcro® closure and double seal.
- Toe and heel caps with fin retainer.

### EVERFLEX BOOTS

- Thickness: 5mm.
- EverFlex upper panels for extra comfort and warmth. So flexible to allow donning and doffing without zippers yet securing a perfect sealing.
- Comfortable and robust rubber sole.
- Toe and heel caps rubber reinforcement to improve comfort and longevity.
- 105° slant at the ankle area to mimic foot orientation in its natural swimming position.

### DELTA 5 & 6,5

- Thickness: 5mm and 6,5mm for temperate or cold water diving.
- Zipper and inner gusset for easy on and off.
- Toe and heel caps and fin retainer.
- Anti-slip, non-marking molded sole.

HYBRID CARGO SHORTS

### DELTA SHORT BOOTS

- Thickness: 5mm with rubber sole for added comfort.
- For warmer waters, slips on and off without zippers.

### NEOPRENE 3MM SOCKS

- Pull on sock style.

# ESSENTIALS

## ESSENTIALS

SCUBAPRO is totally committed to the concept of a comprehensive diving system, which is why we devote a substantial amount of time and resources to the perfection of three seemingly simple yet essential diving products that form the core of our advanced scuba systems: fins, masks and snorkels.

## CHOOSE THE RIGHT FIN

There are three primary variables to consider when selecting a fin: power, efficiency, and fit. In general, the more water a fin moves, the greater its kicking power. Furthermore, fins that transfer a greater percentage of your kicking effort into forward motion are considered to be more efficient. SCUBAPRO offers a complete range including split fins, adjustable and full foot fins, made from diverse materials for various diving needs. Our unique Seawing Nova fins are now recognized globally as the ultimate in comfort and for powerful thrust in the water.

## SEAWING NOVA

The Seawing Nova combines classic SCUBAPRO fin technology with the latest innovations in hydrodynamic design. This fin has the power, acceleration and maneuverability of a paddle fin but the comfort and effortlessness of a split fin. The articulated joint allows the blade to pivot and the entire blade generates thrust.

- Clean water blade allows water to flow cleanly onto the working section of the blade for less drag and increased thrust meaning optimal propulsion.
- Variable pivot control ribs technology ensures the most efficient angle of attack is maintained no matter how hard or softly you kick, generating thrust without drag or wasted energy.
- Ergonomic foot pocket with extended heel plate for the best comfort and ultimate power transmission.
- Heavy duty marine grade bungee heel strap system with custom adjustment system for total comfort and convenience.
- Wing tips arc upwards, increasing high-speed stability.
- Durable Monprene® construction.
- Available in Black and White.
- Optional color straps available in yellow and blue.

COLOR STRAPS

SEAWING NOVA

## TWIN JET MAX - ADJUSTABLE

The ultimate in fin propulsion technology. Twin Jet Max Fins feature a patented split-hydrofoil shape to deliver optimum power with minimum effort, plus dual-compound construction, which enables SCUBAPRO to fine-tune performance and optimize maneuverability and diver comfort. Delivered with Steel Spring Straps for complete comfort and durability.

- Patented split-fin propeller technology has been proven to deliver more forward motion with considerably less effort than traditional blades.
- Dual-compound construction blends the best characteristics of two different yet compatible compounds to achieve the highest level of flex and performance.
- Drag-reducing vents substantially decrease resistance on both up and down strokes.
- Extended soleplate acts like a lever to enhance power stroke. Semi-rigid side rails add blade stability through kick.
- Soft, vented foot pocket is bio-engineered for optimum fit and comfort while seamlessly transferring energy from the diver to the fin.
- Our Steel Spring Straps allow you to easily and quickly slip on your fins. No struggling with adjustments or getting a twisted strap over your boots. The spring strap simply rolls onto your heel and keeps the fin snugly, yet comfortably on your feet.
- Available in Red, Yellow and Blue.

DOWNSTROKE

UPSTROKE

TWIN JET MAX - ADJUSTABLE

### TWIN JET - ADJUSTABLE

SCUBAPRO's Twin Jet Fins use a split-hydrofoil shape to deliver more forward motion with less effort. Result: more power with less effort and drag.

- Patented split-fin propeller technology — proven to deliver more forward motion with considerably less effort than traditional blades.
- Drag-reducing vents substantially decrease resistance on both up and down strokes.
- Extended soleplate acts like a lever to enhance power stroke. Semi-rigid side rails add blade stability throughout kick.
- Extra-wide foot pocket is ideal for wearing with a dry or semi-dry suit — also very comfortable to wear with standard warm water boots.
- Quick-connect swivel buckles.
- Molded from a stiff compound to deliver a slightly negative buoyancy.

### JET FINS

SCUBAPRO Jet Fins have a long and celebrated history of performance. They set the standard for power and durability in 1965, and continue to be immensely popular today.

- Proven vented design decreases drag on the upstroke and enhances thrust on the downstroke.
- Adjustable heel strap secures strap for ease of pre-dive preparation.
- Spring heel straps available as an optional accessory.

TWIN JET - ADJUSTABLE

JET FINS

## JET SPORT - ADJUSTABLE

Jet Sport is a recent, modern, powerful and high performing blade fin, perfect for all divers wanting performance from a traditional blade fin.

- Big blade for a more powerful response in the water.
- Drag reducing vents substantially decrease resistance on both up and down strokes, transferring kicking effort into forward motion for ultimate efficiency.
- Three material blade construction optimizes flex and comfort to achieve a high level of performance.
- Ergonomic foot pocket specially constructed for ultimate comfort and fit. Perfect for wear with neoprene booties and socks.
- Available in Blue, Black and Red.

JET SPORT - ADJUSTABLE

## JET CLUB - FULL FOOT

Jet Club fins are ideal for divers in tropical and temperate waters. They are quality-made, offering years of diving enjoyment. The full foot style is for comfortable diving without boots or neoprene socks. And our foot pocket is the most comfortable out there. It lets divers enjoy their underwater experience even when on multiple or long dives. Jet Club is also an exceptional and prestigious snorkeling fin.

- Extra comfort ergonomic foot pocket for relaxing fit and feel, even during extended use. Its so comfortable you may not want to put your shoes back on.
- Duo-compound full blade construction optimized with vertical channels for efficient kicking power and mobility underwater.
- Modern good looks and clean design lines: we are sure to have a classic in the making with Jet Club.
- Super flexible blade can really take a beating without breaking, no matter how hard you kick or bend it, Jet Club holds up.
- Available in Blue and Black.

JET CLUB - FULL FOOT

## CHOOSE THE RIGHT MASK

The most important consideration in mask selection is fit. No two faces are alike, so SCUBAPRO's broad range takes individual differences into account. One basic difference in masks lies in the number of lenses.

SINGLE-LENS masks remain a popular choice worldwide because they provide a broad, uninterrupted view.

TWIN-LENS masks have become increasingly popular because they typically lower internal volume and are easier to clear.

To increase peripheral vision and transfer more light, SCUBAPRO has incorporated side lenses into selected masks.

A final consideration in mask selection is ease of clearing.

Low-volume masks and models with purge valves make clearing easier, even for the less experienced diver.

### SPECTRA

A metallic-look frame twin-lens mask. Exclusive paint process gives your mask the rich look of stylish eye-wear, underwater.

- Compact two-window design.
- Swivel buckles for easy adjustment.
- Tempered glass lenses.
- Crystal-clear or black double-sealed silicone skirt.
- Available in five colours, including three duo-tones.

### SPECTRA 2

Now every face can wear a Spectra. The Spectra 2 resembles the metallic-look frame twin lens Spectra mask, but is smaller in size.

- Exclusive paint process, giving your mask the rich look of stylish eye-wear, underwater.
- Available in five colours including our Pearl White version.

### VOLTA

New for 2011 this compact mask offers style and great fit.

- Compact twin lens style.
- Proprietary paint process for lasting good looks.
- Tempered glass lens.
- Double sealed silicon skirt in either clear or black for superior comfort.
- Swivel buckles for easy adjustment.
- Available in four color combinations.

SPECTRA

SPECTRA 2

VOLTA

CLEAR VU PLUS

### CLEAR VU PLUS

A low profile twin lens mask with side windows to enhance peripheral vision.

- Low volume for easy clearing and nice fit.
- Seamless side window design for panoramic view.
- Crystal-clear, double sealed silicone skirt.
- Available in 3 colors.

### SCOUT

A sporty low volume mask for easy clearing and comfortable fit.

- Compact two-window design.
- Swivel buckles for easy adjustment.
- Tempered glass lenses.
- Crystal-clear or black double-sealed silicone skirt.
- Available in five colour combinations.

### MASK CLASSICS

#### FULL-FACE MASK

A professional-quality full-face mask, widely used by military and commercial divers worldwide.

- Ideal design for using secondary air source, diving in contaminated environments, or employing an underwater communication system.
- Reduced weight makes it very comfortable to wear.
- Designed for safety and comfort while diving in very cold water, wrecks, caves, or technical diving environments.

#### FUTURA 1

- Classic design with lens positioned close to the eyes fits smaller faces and is appreciated by free divers.
- Lowest possible volume provides a wide field of vision along with easy clearing.
- Very easy to reach nose piece for quick and easy equalizing.
- Easy to adjust pivoting buckles.

FULL-FACE MASK

FUTURA 1

SCOUT

### FRAMELESS

- A SCUBAPRO classic professional mask.
- Single-lens mask featuring a unique assembly of lens and skirt without a frame.
- Reduced weight, size and volume makes clearing water easy.
- One-hand, quick-adjust buckle system attaches directly to skirt to maximize comfort and fit.
- Low profile, durable soft black silicone skirt and black body.

FRAMELESS

### CRYSTAL VU METALLIC

- Available in four exclusive colours.
- Exclusive metallic paint process including three duotone colours.
- Crystal-clear, double-sealed silicone skirt for superior fit and comfort.
- Patented single lens with seamless side window design results in a panoramic field of vision.
- Low volume styling for a snug fit and ease of clearing.

CRYSTAL VU METALLIC

### CRYSTAL VU PURGE

Patented single-lens design with seamless side window for a panoramic field of vision.

- Patented purge valve for easy clearing.
- Crystal-clear, double-sealed silicone skirt for superior fit and comfort.
- Low-volume styling for a snug fit.
- Available in 2 color versions (blue and transparent).

SOLO

CRYSTAL VU PURGE

FRAMELESS 2

ORBIT

## FRAMELESS 2

- Single-lens mask featuring a unique assembly of lens and skirt without a frame.
- Reduced weight, size and volume makes clearing water easy.
- One-hand, quick-adjust buckle system.
- Low profile, durable soft black silicone skirt and black body.
- Available in 3 colors.

## SOLO

A modern low profile and open-view single lens mask.

- Dual colored frameless single-lens design for significantly increased field of vision.
- Crystal-clear, double sealed silicone skirt.
- Low volume design for easy clearing.
- Available in 3 colors.

## ORBIT

A new addition to our 2011 mask line: Small volume and exceptionally comfortable extra soft silicon skirt. This is the wave of the future in masks!

- Low volume mask with special soft nose pocket for extremely easy clearing.
- Ultra fine and soft silicon skirt for perfect fit and comfort.
- Available in transparent or black.
- Wide panoramic view.

## CHOOSE THE RIGHT SNORKEL

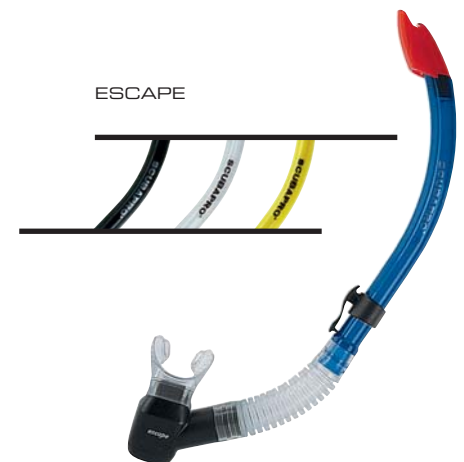

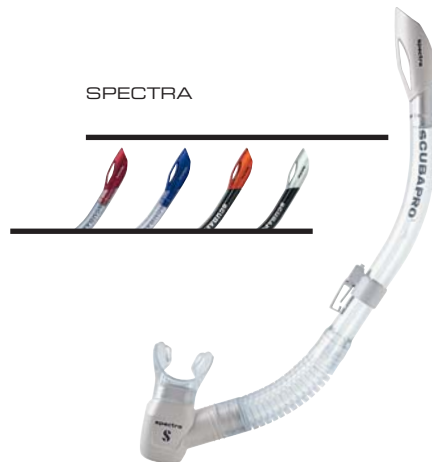

In its very simplest form, a snorkel is a bent tube that enables you to breathe with your face underwater. Quite naturally, the configuration of that tube and the design of its components will determine its level of comfort during use. All SCUBAPRO snorkels are hydro-dynamically designed for exceptional performance. Elliptical barrel models cut through water with very little resistance, allowing unrestricted breathing and ease of clearing. Contoured models bend closely around your head to minimize drag. Semidry top models help prevent water entry into tube. All SCUBAPRO models incorporate specially-designed silicone mouthpieces that conform correctly to your bite, and can be angled for maximum comfort.

### NEXUS

- Three-dimensional barrel for a streamlined snorkeling experience.
- Angled purge valve to divert bubbles out of sight.
- Ergonomic mouthpiece for added comfort.
- Flexible, corrugated section drops snorkel from face when not in use.
- Quick-connect mask clip.
- Extremely flexible barrel allows you to fold and store in BC pocket.
- Available in Black, Blue, Yellow, Clear, and Black/Red.

### VERVE

- New for 2011. Made of highest quality polyurethane and silicone compounds.
- Elliptical barrel for less drag when snorkeling.
- Rotating silicone mouthpiece for easy positioning and prolonged comfort.
- Quick-connect mask clip.
- Available in Blue, Red, Yellow, and White.

## SPECTRA

- Available in five metallic colours, using a unique paint application process. Coordinates with our Spectra and Spectra 2 masks.
- Semi-dry top design helps prevent water entry into tube.
- Large bore tube for easy breathing.
- Flexible, corrugated joint drops snorkel from face when not in use.
- Ergonomic regulator style mouthpiece for added comfort.
- Purge valve at lowest point for effortless clearing.

## ESCAPE

- Semi-dry top design helps prevent water entry into tube.
- Large bore tube for easy breathing.
- Flexible, corrugated section drops snorkel from face when not in use.
- Ergonomic mouthpiece for added comfort.
- Purge valve at lowest point for effortless clearing.
- Cell phone-style removable clip.
- Available in Black, Blue, Yellow, and Clear.

## CURVE

- Classic, economical “J” snorkel design.
- Very comfortable mouthpiece.

## TRINIDAD COMBO

- Frameless, low-volume mask design.
- Vented flex snorkel with splash guard.
- Available in Black and Clear.

## CURRENTS COMBO

- Clear silicone skirt with dual lenses.
- Vented flex snorkel with splash guard.

## KIDS' CURRENTS COMBO

- Clear silicone skirt with single lens.
- Vented snorkel with dry-top.

## TECHNICAL FEATURES

Travel is a major part of diving and SCUBAPRO appreciates the importance of correctly transporting and protecting your equipment. Our bag line has been developed for diver particular needs, incorporating convenience and comfort into ultra-strong gear bags.

SCUBAPRO "Black Edition" bags have been designed using precise and technical specifications for resistance and durability, engineered for long life wear and tear, able to withstand harsh treatment, even in the wettest conditions.

- Robust, abrasion resistant yet lightweight NT Fabric (combination of Nylon and reinforced Polyester PVC with Polyester piping), featuring coil zippers with customized SCUBAPRO pullers.
- Lightweight, extremely tough nylon net fabric with YKK salt water resistant zippers for Mesh bags.
- Polyester thread: extremely resistant against salt water and traction.
- All main compartments feature double zipper sliders to enable the use of a locking system.
- All wheeler models are equipped with salt water resistant in-line wheels, stainless steel wheel shafts and a long telescopic pull handle for maximum convenience when towing.

PORTER BAG

- Exclusive SCUBAPRO rubber ergonomic handles for comfort, complementing our unique modern bag design.
- Padded straps and water resistant polyester webbing for complete carrying ease.
- Removable ID Card Holder for quick bag identification when traveling.

## DIVE'N ROLL DELUXE

A travel giant classic.

- Virtually indestructible hard case body.
- Three detachable elements: a wheeled suitcase with trolley pull, a zipper detachable travel gear bag and a daypack. Use them independently or all at once.
- Capacity: 209L; Weight: 9,0kg

## PORTER BAG

Full size, big volume, yet lightweight for entire set of gear.

- Integrated wheels to pull trolley style plus rigid bottom supports heavy gear, keeping its shape.
- Capacity: 174L; Weight: 4,0kg

CARAVAN BAG

## CARAVAN BAG

Easy to move from the car to the boat or roll at the airport, the Caravan is the ideal large travel rolling bag.

- Telescopic towing handle and reinforced wheels in recessed housings for easy transportation.
- U-shape top zipper gives full access to contents.
- Exterior side pockets.
- Capacity: 86L; Weight : 4,5kg

## CABIN BAG

New for 2011. Size conforms to IATA regulations making it the perfect carry on luggage.

- Telescopic towing handle and reinforced wheels for easy transport.
- Capacity: 34/41L Weight: 3,6kg
- Dimensions: 50cm x 36cm x 19/23cm

CABIN BAG

## JUMBO BAG

The versatile bag you can't do without.

- Lightweight, roomy with multiple pockets for all travel needs.
- Capacity: 84L; Weight: 1.75kg

## SPORT BAG

A lightweight bag for diverse travel.

- Perfect for going to the gym or a change of clothes after diving.
- Capacity: 49L; Weight: 1,0kg

## DRY BAGS - 125L, 75L, 25L

Combines the convenience of a sport bag with waterproof capability of a dry bag. Available in 3 sizes.

- Low profile design for limited spaces with U-shaped top zipper for easy access.
- Padded shoulder strap for easy carrying.
- Capacity: 125L: 1.3kg / 75L: 1.06kg / 25L: 0.62kg

## MESH BAG

A classic and well-loved dive bag. Net material lets the water drain easily. Perfect for live aboard or carrying suits separately.

- Capacity: 95L; Weight 0.70kg

## MESH SACK

Duffel style backpack ideal for snorkeling or tropical diving gear.

- Nylon mesh bag with padded backpack straps and interior and exterior pockets.
- Folds into its own front pocket for storage.
- Capacity: 86L; Weight: 0,61kg

## DRY SACK

Cylinder-style, large volume bag keeps contents sealed and dry.

- Roll-top closure and stitched/tapped construction to ensure water tightness.
- Padded backpack straps and comfy molded handle so you can haul it as you like.
- Capacity: 88L; Weight: 1,1kg

### PHAD 8

LED is revolutionary for today's generation of dive lights. They are nearly indestructible, shockproof and due to recent technological developments they offer an output that no other classic light source can match. SCUBAPRO's innovative PHAD 8 features:

Flood Proof Head technology: Even if the head drops into the water there is no damage.

- Dimming function allows for 100%, 50% plus strobe mode.
- Delivered in ecologically designed packaging with batteries.
- Lanyard, Mesh Bag, Manual on 512MO USB key, White Strobe 360° Diffuser Cap.
- Max. Depth 200m.
- Modular: Head can be used on battery pack and umbilical compatible. (available as option)
- Medium size torch (25cm length) with handle.
- 1 P7 LED head; 900 lumen/100 Watt, 12volts with 8 AA batteries & with battery pack/umbilical.

PHAD 8

NOVA 230

### NOVA 230

A medium sized high intensity LED for incredibly long burn-time: from 14 to 18 hours. The perfect primary light for recreational diving or as a backup for more technical dives.

- Rugged aluminum casing, even tougher than it appears.
- Powered by three user-replaceable C alkaline batteries.
- Rated output: 230 lumens.

### NOVA HP

Lightweight, compact and provides up to eight hours of high-intensity light from an LED bulb.

- Rugged aluminum barrel for corrosion resistance.
- Powered by three user-replaceable AAA alkaline batteries.

### FUEGO LIGHT

- 5 watt LED. Compact design.
- Double O-ring seal. Slide switch with lock.

NOVA HP

FUEGO LIGHT

### MAKO

- In both lightweight Titanium or Stainless Steel.
- 8.5cm multifunctional blades with conventional edge, line-cutting notch, serrated edge and bottle opener.
- Protective sheath with one-hand release locking mechanism.

### WHITE TIP KNIFE

- Compact 6,4cm stainless steel classic blade plus multi-use serrated edge.
- Includes locking sheath and kit for BC/hose attachment.

### K-6

- 15,5cm stainless steel blade, stainless steel hammer in handle. Includes locking sheath.

### K-5

- 11cm stainless steel blade, includes locking sheath.

### K-4

- 9cm stainless steel blade, ideal BC attachment. Includes locking sheath.

### MESH CUTTER

- 7,5cm stainless steel blade with curved edge design.
- Contoured shackle spanner tool and protective sheath.

### FOLDING KNIFE

- Heavy duty stainless steel folding knife and case for all your practical diving and shoreside needs.

## POCKET WEIGHT BELTS

- Makes weight adjustment easy, even when floating on the surface.
- Various lengths available with multiple pocket options.

## ECO WEIGHTS

- Ecologically safe, with double PVC bags and double-sealed to prevent any contact between lead and water.
- Ideal with all weight systems.

## ANKLE WEIGHTS

- Additional ankle weights for use with drysuits or those who want better redistribution of weight for better body position.
- Relieves weights on waist or hips.
- Available in two sizes: 1kg & 0,5kg

## STANDARD WEIGHT BELTS

- Traditional 5cm wide nylon weight belts in fast drying fabric to prevent mildew and odor.
- Nylon or stainless steel quick release buckle.

## TRAVEL ADAPTER

- Light-weight alloy adapter, perfect for converting DIN systems into International systems when traveling.
- Built-in thread so can be instantly and safely mounted, without any tools.

## UNIVERSAL HANGER

- Specific place on hanger for every piece of gear: regulators, BC, wetsuit, booties and extra tank valve O-ring.
- Includes visible name plate.

## DRYSUIT HANGER

- Holds suit and boots for head down hanging.

## UNDERWATER SLATE

- Sturdy, lightweight phosphorescent underwater writing slate for communication in various circumstances and light conditions.

## POCKET WEIGHT BELTS

# INNOVATION IN DIVING

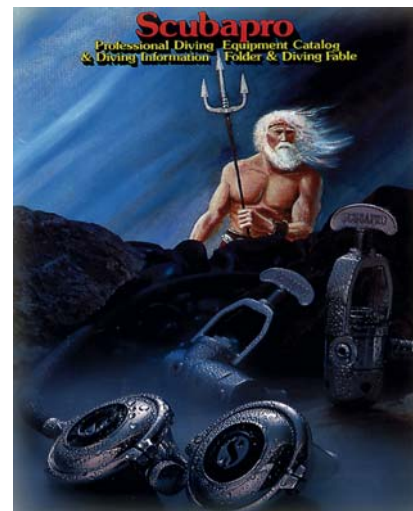

SCUBAPRO first appeared in the scuba diving world in the early 1960's and brought to the market many innovations for diving that are still being used today. In 1965 the first version of the Jet fin first appeared. After 48 years the fin is still popular with technical and military divers worldwide and is one of the most copied scuba products ever sold.

Today, SCUBAPRO remains a premier manufacturer of diving equipment and employs over 330 people spread over 11 countries, covering North and Latin America, Europe, Middle East, Africa, Asia and Australia. SCUBAPRO-UWATEC is also 2 R&D centers, 2 factories and 6 sales and distribution centers. SCUBAPRO UWATEC is part of Johnson Outdoors Inc.

This short sampling of historical adverts gives a flavor of our innovative products throughout the years.

**AIR II**  
second generation  
**Alternate Inflator Regulator**

Uno strumento, due funzioni:  
• SECONDO ERGATORE  
• ALIMENTATORE DEL VOSTRO EQUILIBRATORE

Utilizzabile su tutti gli equilibratori esistenti

Perché seconda generazione? Perché rispetto alla prima generazione AIR II è ora più leggero, confortevole, semplice da usare, con portata d'aria maggiore

The AIR II, Alternate Inflator Regulator, combines a power inflator and a second stage regulator in ONE UNIT

AIR II second generation has even improved on itself. These units are lighter, more comfortable, easier to operate and perform even better (SCUBAPRO AIR II is consistent with all type B.C.'s)

AIR II (Alternate Inflator Regulator)  
Le seul défendeur infateur  
Un modèle pensé par l'expérience SCUBAPRO  
Emplacement embouchement facile, simple de fonctionnement, branchement simplifié  
extension réduit.  
(Compatible avec toutes les bouteilles)

**UWATEC**

DER TAUCHCOMPUTER AUF DEN SIE GEWARTET HABEN

OHNE GRENZEN

Überwinden Sie die Grenzen konventioneller Tauchcomputer mit dem Galileo für den ersten Tauchcomputer mit integrierter Profiltimerfunktion. Erhöhen Sie die Sicherheit und den Spaß bei Ihren Tauchgängen durch innovative Technologien und intuitive Design.

- mit integrierter digitaler Kompass mit Polarkoordinate
- 10 in der Neigungsmessung durch präzisen Multi-Gas Algorithmus
- Individuelle Überwachung des Partialdruck für maximal vier Gasansätze an der 1. Buhl auch für die Perfomedienwertung
- Aufgeschwimmte, große, hellen Farne Display mit dem anschaulichen Diagramm
- Zeitgeber durch Ultraschall
- Temperatur
- Intuitive PADI - gesteuerte Tauchgänge
- Auch ein Galileo Termometer ohne aufwendige Gasbelegung (Multi-Gas- und Hochdruck)

Das Galileo Line von UWATEC in Zusammenarbeit mit PADI - immer für eine tolle Tauchreise.
